Features

- 18 or 22 oz. covers
- 15 covers
- 24" x 72", 84", or 96" heights
- Fire-retardant to all codes
- Anti-bacterial vinyl
- 2" foam, fire or non-fire retardant

Fire Retardant Foam

Nissen® Wall Padding is also available in fire-retardant urethane foam that meets all fire codes. All foams are also available with our Pyrosnuff Barrier Film for an extra margin of safety.

Custom sizes are our specialty !

Installation Techniques

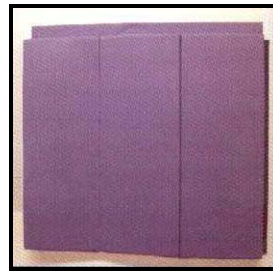

- 1" nail margins or no nail margins
- 1" x 3" firing strips as a base for the 1" nail margin

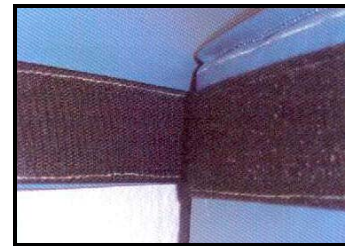

Z-clip mounting attachments allow for easy removal of wall panels, repair or replacement.

Temporary Wall Padding

- Folding hanging wall mats
- EZ up and down

Velcro attachments allow easy installation for your multi-purpose facility. Give us your length and width. Available in all colors, fabrics and foams.

SPORTSGUARD
QUALITY GYMNASIUM
PRODUCTS & SERVICES

Indoor-Outdoor Portable Padding

Adaptable foam padding for temporary or semi-permanent applications. Use our 2"- 4" urethane depending on your use. Three easy attaching methods for on and off. Any size to order.

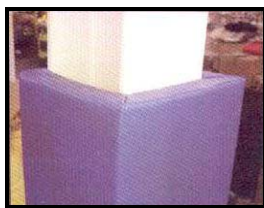

Tunnel loop

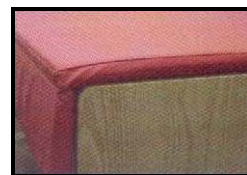

Grommet strip (shown) or D rings

I-Beam & Column Padding

Give us your exact dimensions for these plywood-backed custom foam pads.

Stage Pads & Mats

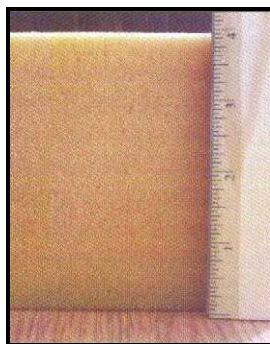

Our hinged-top return stage pad mounts to the top edge or face of the stage with secure velcro attachments. Non-hinged styles also available. All custom made to your dimensions.

Foams & Fabrics

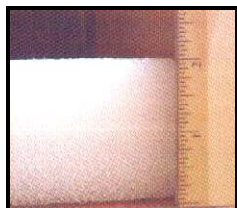

URETHANE FOAMS

We stock this "soft" foam from 2" up to 12" thickness in 1 lb. and 2 lb. densities, and 30 ILD up to 100 ILD (see *Foam Dictionary*). Urethane foam is used for beginning gymnasts and light tumbling, and in thicker versions in landing mats.

POLY FOAMS

Closed-cell, cross-link poly foam offers firm, lightweight, shock-absorption for the top recoil. Often used for high-impact activities like advanced gymnastics and martial arts. Our 2" thickness is excellent for heavier participants who tend to bottom-out.

Foams Dictionary

DENSITY – Lbs. per cubic foot. (Example: 1.7 lb. density foam mean 1 cubic foot of it weighs 1.7 lbs.)

ILD – INDENTION LOAD DEFLECTION is a measurement of foam firmness and is independent of foam density. ILD is measured by indenting (compressing) a foam sample of 25% of its original height. The amount of force in lbs. required is its ILD measurement. The more force required, the firmer the foam. Open-cell foam ILDs usually range from 10 ILD (super soft) to 100 ILD (very firm).

CROSS-LINK – A polyethylene foam with a smooth finish

OPEN CELL – A foam you can breathe through (like our urethane foams)

CLOSED CELL – A foam you cannot breathe through (like our poly foams).

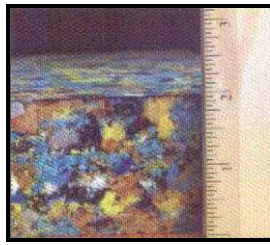

Nissen® mat and wall padding fabrics are tough!

Super tear-resistant PVC-coated shells with high UV, flame resistance and anti-bacterial formulations.

Our PVC-coated fabrics can take the most rugged indoor and outdoor wear. All indoor mats and wall paddings meet all fire codes – including NFPA 701, CA Fire Marshall, and UL. Many other vendors use 14 and 18 oz. laminated fabrics, which tend to peel after intended use. Nissen fabrics are coated into one homogeneous layer of PVC and polyester – in either our 18 oz./sq. yd. deluxe or 22 oz./sq. yd. super deluxe weights. Plus we offer many colors to match every need.

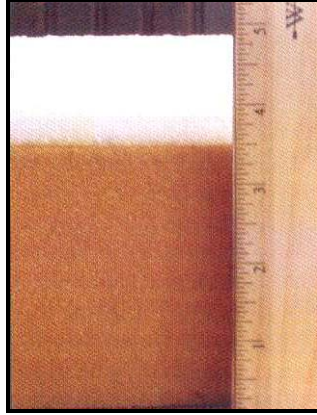

BONDED FOAM

Our 6 lb. density bonded foam provides durability and safety for medium impact gymnastics, exercise and wall padding. Good for semi-firm landings and stability, yet not as firm as our poly foams.

LAYERED LAMINATED FOAMS

Urethane foam laminated to poly foam provides a firm landing surface with a soft cushion underneath to prevent bottoming out. We offer our layered foams in several thickness and layer combinations.

Mats & Pads Colors

Actual colors may vary.
